Research Experience

Ph.D. Researcher <i>Artificial Intelligence & Information Systems Laboratory (AI-ISL)</i> <i>Advisor: Prof. Albert No</i>	<i>Mar 2025 – Present</i> <i>Seoul, Korea</i>
◦ Conduct research on diffusion language models and vision-language reward models, resulting in papers at ICML, ICLR, and EMNLP 2026, an ICML 2026 workshop paper, and an arXiv preprint. ◦ Build training and evaluation pipelines for LLaDA and Dream to study generation dynamics and validate methods such as Rainbow Padding.	
Undergraduate Researcher <i>Artificial Intelligence & Information Systems Laboratory (AI-ISL)</i> <i>Advisor: Prof. Albert No</i>	<i>Jul 2023 – Feb 2025</i> <i>Seoul, Korea</i>
◦ Investigated memorization in image diffusion models, leading to a CVPR 2026 Findings paper identifying CLIP embeddings as a key driver of memorization in Stable Diffusion. ◦ Built large-scale analysis pipelines for memorization and privacy experiments across Stable Diffusion variants.
